The national fire torpor are a cruiser hull with greater resistance and slightly more costs to be built compared to regular cruisers. It is worth tempering their construction in coincidence with the completion of new naval estimates to maximize early production of the playing ship. A torpedo cruiser of a certain technical level requires the release of the regular cruiser technician at the time of completion of the national focus of Torpedo Cruiser. They are also short short. Most IJN CL 1 (those with long-range) have 2.00 minilaying. Bice puts heavy emphasis on the difficulty with the supply of troops a lot through the oceans. The game must choose between being conservative with untrusted minor nations or spending several years of naval production on the convoy. For example, a mitigating solution would be: A, a) to maintain a sequence of old rescues, not too far from each other; b) whenever the search bonuses are relaxed, load an old unless the bonuses have been dropped, modifying a search slot to search for a technology to which the bonus in question is applied and that the player predicts apply in the future; c) save the game and pass the search to the original layout of the player without any necessary pause in the middle; d) do not overwrite this saving until the bonus is used; Save in new files instead in future saves. As with Vanilla Hoi4, the accident modifier of the Marco Polo bridge can be avoided by the direct justification of the war. Something went wrong. With Japan, however, the change has the side effect of drastically increasing the convoy's requirement for internal trade to the pathology point. (The latter is probably not enough. Now theA Ásave will keep the bonus even upon game client reload. Many of the existing destroyers do not have depth charges and thus cannot protect convoys from submarines. When it triggers, some research bonuses will be forgotten upon reloading the game. They can used to mine English Channel for example well before conflict with Allies due to the likely early war with one or all of the Chinese warlords and ROC proper. Note: one IJN admiral does have the Ironside trait which gives a sizable 10% capital ship armor, though he is not the highest level among IJN admirals. However, in orderA Áto mitigate the impact, the player can take advantage of the fact that research currently undertaken will not have an already applied bonus taken away. In any case, the player can of course modify SUPPLY_CONVOY_FACTOR for their own use. Wait a moment Try again. in: Stub of articles, Key Mechanics of Country Modification[]) Nanshin-ron vs Hokushin-ron[] The national focus on North vs South expansion is unlocked through decisions of inter-service rivalry which in turn require the national attention of the Conference of Five Ministers. There is no way to solve the problem on the player's side. (Each individual Army priority decision can allow northern expansion at the end of the day; similarly for navy priority and south expansion.) Tips[] The large amount of search bonuses from Japanese National Focus can push the old Iron Hearts IV bug by 'forgetting' existing search bonuses to trigger. Potential armored government capital bonuses and doctrines for Japan are as follows: Capital Ship Doctrine 6.5% + Decisive Battle 3% (locked and cannot change) + Kure Naval Arsenal 5% + Nobutake Kondo 5% + Soemu Toyoda 7% (requires Battleship Focus) Kure Naval Arsenal requires 2 additional shipyards They go to Chugoku. Warning, however, war justification could push AI UK to secure China. These CLs, along with the Wakatake and Mutsuki class Dds, have the opportunity to reach the Pacific and the United Kingdom through docking rights. rights.
